New Product

EBE sensors + motion

Fluid Quality Sensors

EBE's corTEC® fluid quality sensors QCRB offer a whole new level of opportunities to detect and monitor fluid properties. Applicable for gases, liquids, solids and even highly viscous media, corTEC® sensors will detect properties exceptionally well even without direct contact to the media.

Technical Specifications

- Fluid quality & fluid property measurement by EBE's proprietary corTEC® sensor technology
- Measurement offers capacitive and conductive values
- Suitable for special hygienic, rugged or miniature enclosures
- Excellent sensitivity and repeatability even with media of the lowest dielectric constants (even $\varepsilon_r < 2$)
- corTEC® sensors offer periodic autocalibration during operation and are immune to almost any interference and artifacts
- Easy communication with I^2C, various option on request
